Diablo 2 druid speedrun guide

Our beloved Daabo is coming back to 2, with many new teachings & insights brought along. And it's just the right to share, which I've learned now. This Dabelow 2 guide is for resources for all d2 supplier resources related, covering a wide list of suggestions, strategies, resources, software, mods, constructions and items. Another passed and ever extended guide-by-the-faraz Jafara table: Tips & Command Simple Commands that make your life easier ctrl+ left to sell it click an item. Drag and drop more. Shift + Right-click on the scarel and plants while in the shop to fill your entire grave or belt of this particular item. Shift + Click the plants left in your inventory so that they place themselves in your belt. Shift + No. 1-4 to help your purchase with your belt/nopickup and you will not pick up, unless you hold the alt. Ideal for mailletters/construction/players (1-8) increasing the difficulty of the game in the singlyplayer, while increasing, communication & drop rate (more later). Do not be greedy anti-malicious, but check it out. You never need pickup coins, especially during the first level. This save you a big deal of time in the long run and your levels are eliminated and progressed very quickly through steps/levels. Only by learning what items are valuable you can increase the size of your sash very fast, without walking around like a farmer. Initial level items for pickup: throw away knife, stronglong gas/cracked butter, some blues, stools and uniques. Magic items such as charity, ringing and reed are sold regardless of the figures. After overcoming poverty at the initial level, focusing on item values and flowing money to you now will not be the problem. Well, unless you can control you when it comes to the joa. Decent drops sell for 10+ vendors and just pick-up large pot (around 1k+ mark) from elite sheep/owners. Open The Chats & To open whether you are running at what stage or difficult, take the time to open the chats, the stones and brakes are visible under the jar. 40-50% drops of your magic item will be found in these hidden items. Even more important are the elite sheep and owners. Learn a great job initially on your misguided words & recipes. Getting acquainted with misguided words and recipes will be part of the process of being well prepared for high odds (dream & hell) and soni in statistics & skills to overcome your enemies. Knowing about the initial words will help a lot, basically. General lying by initial level usually the words are moved by item to item level of objects = Sor + Al Nadir Level 13 Nef + Sor Sor Sor Scobet Level 15 A + Al + Eth Cochah Marine Level 17 + eth Address level 19 Trumpet + Resin Zefer level 21. + To waste + Till-pure thunder level
